Who Made It? Virtual Activity

TARGET GRADES
Middle School
High School

OBJECTIVE
Students will learn the range of careers that go into developing, distributing and selling products or services that are made in our region. They will also be able to familiarize themselves with some of the major employers in our region.

PREP TIME REQUIRED
5 minutes

PREP STEPS
• Research products or services that are developed or produced locally such as a Boeing 737 or Microsoft XBOX. A longer sample list is provided below.
• Download photos of these products to share with students either through screen share on zoom or a different method
• Share the “Made Local Response Sheet” below, or simply have students write their answers on their own paper.

ACTIVITY TIME REQUIRED
15 minutes

ACTIVITY INSTRUCTIONS
1. Break students into small teams (3-5 students)
2. Give each small team the name of a product or service made by a company in the Puget Sound
3. Give students 4-7 minutes (or more if you want!) to brainstorm all of the careers that go into developing, producing and selling that product
   • Before starting, you may want to provide your own example to give students the idea. For example, if the item was a “Theo Chocolate Bar,” careers might include: supply chain manager (sources ingredients), graphic designer (develops packaging) and sales manager (sells product to stores).
   • If students are having a difficult time, you can have them go on the company’s jobs/careers web page to browse job openings to get ideas.
   • Remind students to think about things like: What is the product made from? How did they learn about the product? How does the product get to them?
4. Have teams report out for their team how many careers they got and the favorite career they identified and why. The team that has brainstormed the largest number of careers listed wins!
DEBRIEF QUESTIONS

- What were some careers you heard about that you hadn’t thought of before?
- Was there a career you heard about that you are interested in exploring?
- Is there a company you heard about that you are interested in learning more about?

STRETCH ACTIVITY IDEAS

- Introduce the 16 Career Clusters and have the students connect the careers they brainstormed to the clusters. Have students discuss the cluster they are most interested in, and one they’d like to learn more about.
- Have teams research their product or service and present to the class about the careers involved in making it.
- Once students have gone through the main activity, have students choose one career or company to research and share about with the class or a small group.
